

# AIPI - TECHNICAL HOSTING REQUIREMENTS

## AIPI - TECHNICAL HOSTING REQUIREMENTS

### CRITICAL COMPATIBILITY WARNING

AIPI AI widgets require specific hosting resources.

Not all hosting plans are compatible.

85% of performance issues = inadequate hosting.

### DOCUMENTED INCOMPATIBILITY CASES

HostGator - Shared Plans (ALL INCOMPATIBLE):

â€ Personal Plan: 25% CPU max, 30s timeout

RESULT: Confirmed freezing on mobile devices

â€ Business Plan: SAME limitations as Personal

RESULT: NO performance improvement

â€ Baby Plan: Identical restrictions

RESULT: Guaranteed problems

Common Symptoms Identified:

- Freezing during registration from mobile
- Messaging timeouts >30 seconds
- Automatic CPU throttling
- Slow AI responses
- Failures during high load periods

### MINIMUM TECHNICAL REQUIREMENTS

CPU: No 25% limit (equivalent to 1 core access)

RAM: 1GB available guaranteed

PHP: Version 8.0+ with 120s timeout minimum

Database: MySQL 5.7+ or PostgreSQL 12+

SSL: Valid certificate (Let's Encrypt OK)

Architecture: LiteSpeed/NGINX (NOT Apache LAMP)

Storage: SSD recommended (HDD acceptable)

Bandwidth: 10GB/month minimum

### RECOMMENDED HOSTING PROVIDERS

=== LOW BUDGET (\$3-5/month) ===

â€ ChemiCloud Starter

Capacity: 25,000 visits/month
